ATTACHMENT 8.2.4B

REVISED STATUTORY BUDGET END JUNE 2018

REVISED BUDGET FOR YEAR END 30 JUNE 2018

BODDINGTON SHIRE COUNCIL AMENDED BUDGET 2017-18

CONTENTS

Note		Page
	Standard Statements	
	Statement of Financial Activity	1
	Statement of Comprehensive Income (by Nature/type)	2
	Statement of Cash Flows	3 - 4
	Statement of Changes in Equity	5
	Rate Setting Statement	6 - 7
	Statement of Financial Position	8
	Notes to Budget Amounts	
1	Significant Accounting Policies	9 - 22
2	Operating Revenue and expenses	23 - 24
3	Acquisition of Assets - By Class	25
4	Disposal of Assets	. 25
5	Information on Borrowings	26 - 27
6	Reserves	28 - 31
7	Net Current Assets	32
8a	Information on Rating- rates applicable as per model	33
8b	Information on Rating - differential rating - objects and reasons	34 - 36
8c	Information on Rating - differential rating - public notice	37
9	Specified Area Rate & Service Charges	38
10	Operating Grants	38
11	Fees & Charges	39
12	Rate Payment Discounts, Waivers & Concessions	39
13	Interest Charges and Instalments	39 - 40
14	Councillors Remuneration	40
15	Notes to The Cash Flow Statement	41 - 42
16	Trust Funds	41 - 42
17	Major Land Transactions	41 - 42
18	Trading Undertakings and Major Trading Undertakings	41 - 42
	Capital expenditure and funding schedule	4;

	:			

Notes: Fair value adjustments to financial assets at fair value through Profit or Loss and Other Comprehensive Income (if any), is impacted upon by external forces and is not able to be reliably estimated at the time of budget adoption.

It is anticipated, in all instances, any other comprehensive income will relate to non-cash transactions and as such, have no impact on this budget document.

Fair value adjustments will be assessed at the time they occur with compensating budget amendments made as necessary.

This statement is to be read in conjunction with the accompanying notes.

Notes to and Forming Part of the Budget For the Year Ended 30 June 2018

1. SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of Preparation

The budget has been prepared in accordance with applicable Australian Accounting Standards (as they apply to local government and not-for-profit entities), Australian Accounting Interpretations, other authorative pronouncements of the Australian Accounting Standards Board, the Local Government Act 1995 and accompanying regulations. Material accounting policies which have been adopted in the preparation of this budget are presented below and have been consistently applied unless stated otherwise.

Except for cash flow and rate setting information, the budget has also been prepared on the accrual basis and is based on historical costs, modified, where applicable, by the measurement at fair value of selected non-current assets, financial assets and liabilities.

The Local Government Reporting Entity

All Funds through which the Council controls resources to carry on its functions have been included in the financial statements forming part of this budget.

In the process of reporting on the local government as a single unit, all transactions and balances between those Funds (for example, loans and transfers between Funds) have been eliminated.

All monies held in the Trust Fund are excluded from the financial statements. A separate statement of those monies appears at Note 16 to this budget document.

(b) 2016/17 Actual Balances

Balances shown in this budget as 2016/17 Actual are as forecast at the time of budget preparation and are subject to final adjustments.

(c) Rounding Off Figures

All figures shown in this budget, other than a rate in the dollar, are rounded to the nearest dollar.

(d) Rates, Grants, Donations and Other Contributions

Rates, grants, donations and other contributions are recognised as revenues when the local government obtains control over the assets comprising the contributions.

Control over assets acquired from rates is obtained at the commencement of the rating period or, where earlier, upon receipt of the rates.

(e) Goods and Services Tax (GST)

Revenues, expenses and assets are recognised net of the amount of GST, except where the amount of GST incurred is not recoverable from the Australian Taxation Office (ATO).

Receivables and payables are stated inclusive of GST receivable or payable. The net amount of GST recoverable from, or payable to, the ATO is included with receivables or payables in the statement of financial position.

Notes to and Forming Part of the Budget For the Year Ended 30 June 2018

1. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(e) Goods and Services Tax (GST) (Continued)

Cash flows are presented on a Gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to, the ATO are presented as operating cash flows.

(f) Superannuation

The Council contributes to a number of Superannuation Funds on behalf of employees.

All funds to which the Council contributes are defined contribution plans.

(g) Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, cash at bank, deposits available on demand with banks, other short term highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value and bank overdrafts.

Bank overdrafts are shown as short term borrowings in current liabilities in the statement of financial position.

(h) Trade and Other Receivables

Trade and other receivables include amounts due from ratepayers for unpaid rates and service charges and other amounts due from third parties for goods sold and services performed in the ordinary course of business.

Receivables expected to be collected within 12 months of the end of the reporting period are classified as current assets. All other receivables are classified as non-current assets.

Collectability of trade and other receivables is reviewed on an ongoing basis. Debts that are known to be uncollectible are written off when identified. An allowance for doubtful debts is raised when there is objective evidence that they will not be collectible.

(i) Inventories

General

Inventories are measured at the lower of cost and net realisable value.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

Land Held for Resale

Land held for development and sale is valued at the lower of cost and net realisable value. Cost includes the cost of acquisition, development, borrowing costs and holding costs until completion of development. Finance costs and holding charges incurred after development is completed are expensed.

Notes to and Forming Part of the Budget For the Year Ended 30 June 2018

1. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Land Held for Resale (Continued)

Gains and losses are recognised in profit or loss at the time of signing an unconditional contract of sale if significant risks and rewards, and effective control over the land, are passed on to the buyer at this point.

Land held for sale is classified as current except where it is held as non-current based on Council's intentions to release for sale.

(j) Fixed Assets

Each class of fixed assets within either property, plant and equipment or infrastructure, is carried at cost or fair value as indicated less, where applicable, any accumulated depreciation and impairment losses.

Mandatory Requirement to Revalue Non-Current Assets

Effective from 1 July 2012, the Local Government (Financial Management) Regulations were amended and the measurement of non-current assets at Fair Value became mandatory.

The amendments allow for a phasing in of fair value in relation to fixed assets over three years as follows:

- (a) for the financial year ending on 30 June 2013, the fair value of all of the assets of the local government that are plant and equipment; and
- (b) for the financial year ending on 30 June 2014, the fair value of all of the assets of the local government -
 - (i) that are plant and equipment; and
 - (ii) that are -
 - (I) land and buildings; or
 - (II) infrastructure;

and

(c) for a financial year ending on or after 30 June 2015, the fair value of all of the assets of the local government.

Thereafter, in accordance with the regulations, each asset class must be revalued at least every 3 years.

In 2013, Council commenced the process of adopting Fair Value in accordance with the Regulations.

Relevant disclosures, in accordance with the requirements of Australian Accounting Standards, have been made in the budget as necessary.

Notes to and Forming Part of the Budget For the Year Ended 30 June 2018

1. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(j) Fixed Assets (Continued)

Land Under Control

In accordance with Local Government (Financial Management) Regulation 16(a), the Council was required to include as an asset (by 30 June 2013), Crown Land operated by the local government as a golf course, showground, racecourse or other sporting or recreational facility of state or regional significance.

Upon initial recognition, these assets were recorded at cost in accordance with AASB 116. They were then classified as Land and revalued along with other land in accordance with the other policies detailed in this Note.

Whilst they were initially recorded at cost (being fair value at the date of acquisition (deemed cost) as per AASB 116) they were revalued along with other items of Land and Buildings at 30 June 2014.

Initial Recognition and Measurement between Mandatory Revaluation Dates

All assets are initially recognised at cost and subsequently revalued in accordance with the mandatory measurement framework detailed above.

In relation to this initial measurement, cost is determined as the fair value of the assets given as consideration plus costs incidental to the acquisition. For assets acquired at no cost or for nominal consideration, cost is determined as fair value at the date of acquisition. The cost of non-current assets constructed by the Council includes the cost of all materials used in construction, direct labour on the project and an appropriate proportion of variable and fixed overheads.

Individual assets acquired between initial recognition and the next revaluation of the asset class in accordance with the mandatory measurement framework detailed above, are carried at cost less accumulated depreciation as management believes this approximates fair value. They will be subject to subsequent revaluation on the next anniversary date in accordance with the mandatory measurement framework detailed above.

Revaluation

Increases in the carrying amount arising on revaluation of assets are credited to a revaluation surplus in equity. Decreases that offset previous increases of the same asset type are recognised against revaluation surplus directly in equity. All other decreases are recognised in profit or loss.

Notes to and Forming Part of the Budget For the Year Ended 30 June 2018

1. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(i) Fixed Assets (Continued)

Transitional Arrangement

During the time it takes to transition the carrying value of non-current assets from the cost approach to the fair value approach, the Council may still be utilising both methods across differing asset classes.

Those assets carried at cost will be carried in accordance with the policy detailed in the *Initial Recognition* section as detailed above.

Those assets carried at fair value will be carried in accordance with the **Revaluation**Methodology section as detailed above.

Land Under Roads

In Western Australia, all land under roads is Crown land, the responsibility for managing which, is vested in the local government.

Effective as at 1 July 2008, Council elected not to recognise any value for land under roads acquired on or before 30 June 2008. This accords with the treatment available in Australian Accounting Standard AASB 1051 Land Under Roads and the fact Local Government (Financial Management) Regulation 16(a)(i) prohibits local governments from recognising such land as an asset.

In respect of land under roads acquired on or after 1 July 2008, as detailed above, Local Government (Financial Management) Regulation 16(a)(i) prohibits local governments from recognising such land as an asset.

Whilst such treatment is inconsistent with the requirements of AASB 1051, Local Government (Financial Management) Regulation 4(2) provides, in the event of such an inconsistency, the Local Government (Financial Management) Regulations prevail.

Consequently, any land under roads acquired on or after 1 July 2008 is not included as an asset of the Council.

Depreciation

The depreciable amount of all fixed assets including buildings but excluding freehold land, are depreciated on a straight-line basis over the individual asset's useful life from the time the asset is held ready for use. Leasehold improvements are depreciated over the shorter of either the unexpired period of the lease or the estimated useful life of the improvements.

Notes to and Forming Part of the Budget For the Year Ended 30 June 2018

1. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(j) Fixed Assets (Continued)

Major depreciation periods are as per Council adopted policy F20 Non Current Asset Capitalisation and Depreciation Control.

Land and Buildings

Land	Not depreciated
Buildings	
- External Structure	100 years
- Roof Structure	25 years
- Fitout, including flooring	10 years
- Mechanicals	15 years
Furniture and Equipment	
Computers	2 110000

Computers	3 years
Communications	5 years
Furniture	10 years
Equipment	5 years

Plant and Equipment

Light Plant	5 years
Medium Plant	7 to 10 years
Heavy Plant	10 to 15 years
Minor Plant	7 to 10 years

Roads

Sealed and Unsealed Roads - formation	Not depreciated
Sealed Roads - Pavement	100 years
Sealed Roads - Surface	5 to 20 years
Unsealed Roads - Pavement	5 to 10 years

The assets residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with the carrying amount. These gains and losses are included in profit or loss in the period which they arise.

When revalued assets are sold, amounts included in the revaluation surplus relating to that asset are transferred to retained surplus.

Capitalisation Threshold

Expenditure on items of equipment under \$5,000 is not capitalised. Rather, it is recorded on an asset inventory listing.

Notes to and Forming Part of the Budget For the Year Ended 30 June 2018

1. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(k) Fair Value of Assets and Liabilities

When performing a revaluation, the Council uses a mix of both independent and management valuations using the following as a guide:

Fair Value is the price that Council would receive to sell the asset or would have to pay to transfer a liability, in an orderly (i.e. unforced) transaction between independent, knowledgeable and willing market participants at the measurement date.

As fair value is a market-based measure, the closest equivalent observable market pricing information is used to determine fair value. Adjustments to market values may be made having regard to the characteristics of the specific asset. The fair values of assets that are not traded in an active market are determined using one or more valuation techniques. These valuation techniques maximise, to the extent possible, the use of observable market data.

To the extent possible, market information is extracted from either the principal market for the asset (i.e. the market with the greatest volume and level of activity for the asset or, in the absence of such a market, the most advantageous market available to the entity at the end of the reporting period (i.e. the market that maximises the receipts from the sale of the asset after taking into account transaction costs and transport costs).

For non-financial assets, the fair value measurement also takes into account a market participant's ability to use the asset in its highest and best use or to sell it to another market participant that would use the asset in its highest and best use.

Fair Value Hierarchy

AASB 13 requires the disclosure of fair value information by level of the fair value hierarchy, which categorises fair value measurement into one of three possible levels based on the lowest level that an input that is significant to the measurement can be categorised into as follows:

Level I

Measurements based on quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.

Level 2

Measurements based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly.

Notes to and Forming Part of the Budget For the Year Ended 30 June 2018

1. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(k) Fair Value of Assets and Liabilities (Continued)

Level 3

Measurements based on unobservable inputs for the asset or liability.

The fair values of assets and liabilities that are not traded in an active market are determined using one or more valuation techniques. These valuation techniques maximise, to the extent possible, the use of observable market data. If all significant inputs required to measure fair value are observable, the asset or liability is included in Level 2. If one or more significant inputs are not based on observable market data, the asset or liability is included in Level 3.

Valuation techniques

The Council selects a valuation technique that is appropriate in the circumstances and for which sufficient data is available to measure fair value. The availability of sufficient and relevant data primarily depends on the specific characteristics of the asset or liability being measured. The valuation techniques selected by the Council are consistent with one or more of the following valuation approaches:

Market approach

Valuation techniques that use prices and other relevant information generated by market transactions for identical or similar assets or liabilities.

Income approach

Valuation techniques that convert estimated future cash flows or income and expenses into a single discounted present value.

Cost approach

Valuation techniques that reflect the current replacement cost of an asset at its current service capacity.

Each valuation technique requires inputs that reflect the assumptions that buyers and sellers would use when pricing the asset or liability, including assumptions about risks. When selecting a valuation technique, the Council gives priority to those techniques that maximise the use of observable inputs and minimise the use of unobservable inputs. Inputs that are developed using market data (such as publicly available information on actual transactions) and reflect the assumptions that buyers and sellers would generally use when pricing the asset or liability and considered observable, whereas inputs for which market data is not available and therefore are developed using the best information available about such assumptions are considered unobservable.

As detailed above, the mandatory measurement framework imposed by the Local Government (Financial Management) Regulations requires, as a minimum, all assets carried at a revalued amount to be revalued at least every 3 years.

Notes to and Forming Part of the Budget For the Year Ended 30 June 2018

1. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(I) Financial Instruments

Initial Recognition and Measurement

Financial assets and financial liabilities are recognised when the Council becomes a party to the contractual provisions to the instrument. For financial assets, this is equivalent to the date that the Council commits itself to either the purchase or sale of the asset (ie trade date accounting is adopted).

Financial instruments are initially measured at fair value plus transaction costs, except where the instrument is classified 'at fair value through profit or loss', in which case transaction costs are expensed to profit or loss immediately.

Classification and Subsequent Measurement

Financial instruments are subsequently measured at fair value, amortised cost using the effective interest rate method, or cost.

Amortised cost is calculated as:

- (a) the amount in which the financial asset or financial liability is measured at initial recognition;
- (b) less principal repayments and any reduction for impairment; and
- (c) plus or minus the cumulative amortisation of the difference, if any, between the amount initially recognised and the maturity amount calculated using the effective interest rate method.

The effective interest method is used to allocate interest income or interest expense over the relevant period and is equivalent to the rate that discounts estimated future cash payments or receipts (including fees, transaction costs and other premiums or discounts) through the expected life (or when this cannot be reliably predicted, the contractual term) of the financial instrument to the net carrying amount of the financial asset or financial liability. Revisions to expected future net cash flows will necessitate an adjustment to the carrying value with a consequential recognition of an income or expense in profit or loss.

(i) Financial assets at fair value through profit and loss Financial assets are classified at "fair value through profit or loss" when they are held for trading for the purpose of short term profit taking. Assets in this category are classified as current assets. Such assets are subsequently measured at fair value with changes in carrying amount being included in profit or loss.

Notes to and Forming Part of the Budget For the Year Ended 30 June 2018

1. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(I) Financial Instruments (Continued)

(ii) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and are subsequently measured at amortised cost. Gains or losses are recognised in profit or loss.

Loans and receivables are included in current assets where they are expected to mature within 12 months after the end of the reporting period.

(iii) Held-to-maturity investments

Held-to-maturity investments are non-derivative financial assets with fixed maturities and fixed or determinable payments that the Council's management has the positive intention and ability to hold to maturity. They are subsequently measured at amortised cost. Gains or losses are recognised in profit or loss.

Held-to-maturity investments are included in current assets where they are expected to mature within 12 months after the end of the reporting period. All other investments are classified as non-current.

(iv) Available-for-sale financial assets

Available-for-sale financial assets are non-derivative financial assets that are either not suitable to be classified into other categories of financial assets due to their nature, or they are designated as such by management. They comprise investments in the equity of other entities where there is neither a fixed maturity nor fixed or determinable payments.

They are subsequently measured at fair value with changes in such fair value (i.e. gains or losses) recognised in other comprehensive income (except for impairment losses). When the financial asset is derecognised, the cumulative gain or loss pertaining to that asset previously recognised in other comprehensive income is reclassified into profit or loss.

Available-for-sale financial assets are included in current assets, where they are expected to be sold within 12 months after the end of the reporting period. All other available for sale financial assets are classified as non-current.

(v) Financial liabilities

Non-derivative financial liabilities (excl. financial guarantees) are subsequently measured at amortised cost. Gains or losses are recognised in the profit or loss.

Notes to and Forming Part of the Budget For the Year Ended 30 June 2018

I. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(I) Financial Instruments (Continued)

Impairment

A financial asset is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events (a "loss event") having occurred, which has an impact on the estimated future cash flows of the financial asset(s).

In the case of available-for-sale financial assets, a significant or prolonged decline in the market value of the instrument is considered a loss event. Impairment losses are recognised in profit or loss immediately. Also, any cumulative decline in fair value previously recognised in other comprehensive income is reclassified to profit or loss at this point.

In the case of financial assets carried at amortised cost, loss events may include: indications that the debtors or a group of debtors are experiencing significant financial difficulty, default or delinquency in interest or principal payments; indications that they will enter bankruptcy or other financial reorganisation; and changes in arrears or economic conditions that correlate with defaults.

For financial assets carried at amortised cost (including loans and receivables), a separate allowance account is used to reduce the carrying amount of financial assets impaired by credit losses. After having taken all possible measures of recovery, if management establishes that the carrying amount cannot be recovered by any means, at that point the written-off amounts are charged to the allowance account or the carrying amount of impaired financial assets is reduced directly if no impairment amount was previously recognised in the allowance account.

Derecognition

Financial assets are derecognised where the contractual rights for receipt of cash flows expire or the asset is transferred to another party, whereby the Council no longer has any significant continual involvement in the risks and benefits associated with the asset.

Financial liabilities are derecognised where the related obligations are discharged, cancelled or expired. The difference between the carrying amount of the financial liability extinguished or transferred to another party and the fair value of the consideration paid, including the transfer of non-cash assets or liabilities assumed, is recognised in profit or loss.

(m) Impairment of Assets

In accordance with Australian Accounting Standards the Council's assets, other than inventories, are assessed at each reporting date to determine whether there is any indication they may be impaired.

Notes to and Forming Part of the Budget For the Year Ended 30 June 2018

1. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(m) Impairment of Assets (Continued)

Where such an indication exists, an impairment test is carried out on the asset by comparing the recoverable amount of the asset, being the higher of the asset's fair value less costs to sell and value in use, to the asset's carrying amount.

Any excess of the asset's carrying amount over its recoverable amount is recognised immediately in profit or loss, unless the asset is carried at a revalued amount in accordance with another standard (e.g. AASB 116) whereby any impairment loss of a revaluation decrease in accordance with that other standard.

For non-cash generating assets such as roads, drains, public buildings and the like, value in use is represented by the depreciated replacement cost of the asset.

At the time of adopting this budget, it is not possible to estimate the amount of impairment losses (if any) as at 30 June 2017.

In any event, an impairment loss is a non-cash transaction and consequently, has no impact on this budget document.

(n) Trade and Other Payables

Trade and other payables represent liabilities for goods and services provided to the Council prior to the end of the financial year that are unpaid and arise when the Council becomes obliged to make future payments in respect of the purchase of these goods and services. The amounts are unsecured, are recognised as a current liability and are normally paid within 30 days of recognition.

(o) Employee Benefits

Short-Term Employee Benefits

Provision is made for the Council's obligations for short-term employee benefits. Short-term employee benefits are benefits (other than termination benefits) that are expected to be settled wholly before 12 months after the end of the annual reporting period in which the employees render the related service, including wages, salaries and sick leave. Short-term employee benefits are measured at the (undiscounted) amounts expected to be paid when the obligation is settled.

The Council's obligations for short-term employee benefits such as wages, salaries and sick leave are recognised as a part of current trade and other payables in the statement of financial position. The Council's obligations for employees' annual leave and long service leave entitlements are recognised as provisions in the statement of financial position.

Notes to and Forming Part of the Budget For the Year Ended 30 June 2018

1. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(o) Employee Benefits (Continued)

Other Long-Term Employee Benefits

Provision is made for employees' long service leave and annual leave entitlements not expected to be settled wholly within 12 months after the end of the annual reporting period in which the employees render the related service. Other long-term employee benefits are measured at the present value of the expected future payments to be made to employees. Expected future payments incorporate anticipated future wage and salary levels, durations or service and employee departures and are discounted at rates determined by reference to market yields at the end of the reporting period on government bonds that have maturity dates that approximate the terms of the obligations. Any re-measurements for changes in assumptions of obligations for other long-term employee benefits are recognised in profit or loss in the periods in which the changes occur.

The Council's obligations for long-term employee benefits are presented as non-current provisions in its statement of financial position, except where the Council does not have an unconditional right to defer settlement for at least 12 months after the end of the reporting period, in which case the obligations are presented as current provisions.

(p) Borrowing Costs

Borrowing costs are recognised as an expense when incurred except where they are directly attributable to the acquisition, construction or production of a qualifying asset. Where this is the case, they are capitalised as part of the cost of the particular asset until such time as the asset is substantially ready for its intended use or sale.

(q) Provisions

Provisions are recognised when the Council has a legal or constructive obligation, as a result of past events, for which it is probable that an outflow of economic benefits will result and that outflow can be reliably measured.

Provisions are measured using the best estimate of the amounts required to settle the obligation at the end of the reporting period.

(r) Current and Non-Current Classification

In the determination of whether an asset or liability is current or non-current, consideration is given to the time when each asset or liability is expected to be settled. The asset or liability is classified as current if it is expected to be settled within the next 12 months, being the Council's operational cycle. In the case of liabilities where the Council does not have the unconditional right to defer settlement beyond 12 months, such as vested long service leave, the liability is classified as current even if not expected to be settled within the next 12 months. Inventories held for trading are classified as current even if not expected to be realised in the next 12 months except for land held for sale where it is held as non-current based on the Council's intentions to release for sale.

Notes to and Forming Part of the Budget For the Year Ended 30 June 2018

Notes to and Forming Part of the Budget For the Year Ended 30 June 2018

6. RESERVES (Continued)

In accordance with council resolutions in relation to each reserve account, the purpose for which the reserves are set aside are as follows:

l eave

This reserve is for the cash backed Annual leave entitlements.

Plant & Vehicle

This reserve is for the purchase of major plant and equipment.

Building

This reserve is for the purchase of buildings.

Local Organisation Assistance Fund

This Reserve is for the assistance of local communities in the Shire of Boddington.

Aged Housing

This reserve is for the construction and/or capital maintenance of retirement units owned by the Shire.

Car Parks

This reserve is for the construction of car parks at Shire buildings, parks and ovals.

Refuse Site

This reserve is for the upgrade and rationalisation of Refuse Disposal Facilities within the Shire

High School Sharing Resource

This Reserve is for the sharing of resources between the High school and Shire of Boddington.

Public Open Space

This reserve is for the upgrade and rationalisation of Public Open Space and parklands within the Shire

River Crossing

This Reserve is for purpose of providing for future capital upgrade of the River crossing.

Recreation Centre

This Reserve is for purpose of providing for future capital upgrade of Recreational Hardcourts

Swimming Pool

This Reserve is for purpose of providing for future capital upgrade of the Boddingtom swimming pool.

Prepaid Conditional Grants

To provide a mechanism for identifying prepaid grants where the expenditure associated with be incurred in the next financial year, these mainly consist of prepaid Financial Assistance Grants (FAG) and local roads grants.

Unspent Conditional Grants

To provide a mechanism for identifying conditional unspent grants where the expenditure associated will be undertaken in future years be it operating or capital in nature.

Unspent Loans

To provide a mechanism for restricting loan proceeds unspent for future expenditures be it of an operating or capital nature, this forms part of restricted funds.

Totals								

All land except exempt land in the Shire of Boddington is rated according to its Gross Rental Value (GRV) in townsites or Unimproved Value (UV) in the remainder of the Shire.

between the total estimated expenditure proposed in the budget and the estimated revenue to be received from all sources other than rates and also considering the extent The general rates detailed above for the 2017/18 financial year have been determined by Council on the basis of raising the revenue required to meet the deficiency of any increase in rating over the level adopted in the previous year.

The minimum payments have been determined by Council on the basis that all ratepayers must make a reasonable contribution to the cost of the Local Government

services/facilities.

AMENDED BUDGET 2017-18

Notes to and Forming Part of the Budget For the Year Ended 30 June 2018

8b. RATING INFORMATION - 2017/18 FINANCIAL YEAR Proposed Differential Rates 2017/18 Objects and Reasons;

Councillors and senior staff have been working with the Community Advisory Group, a panel of 14 community representatives chosen to assist it with the major four year revision of the Community Strategic Plan. Although the revised plan is not complete, it is clear that the community have high expectations that the improvements in community facilities achieved by the Council in the past few years should continue.

Some of the suggestions that Council is likely to take up in the 2017/18 and future budgets include;

- · major upgrades to the Hotham River foreshore area,
- improvements in the Ranford Pool area,
- improvements to sporting facilities including new oval lighting towers to compliment the newly opened Sport and Rec Centre,
- beach volleyball courts,
- · playground equipment, including nature play areas and facilities for older youth,
- entry statements on Albany Highway and at the Western entrance to Boddington, and
- funding for economic development initiatives, including re-engaging an economic development officer, previously funded under R4R grants to ensure the continued diversification of the local economy away from mining.

Given the increases in rates across the board last year arising from a change in the valuation of the mining camp, Council is seeking to provide some relief in making the rate increase for 2017/18 quite modest.

To achieve substantial improvements in facilities, while at the same time keeping rate increases for the average ratepayer modest is also one of the driving reasons behind the consideration of differential rating.

The differential rates in the dollar proposed, are an attempt to balance the need for revenue required to fund essential services, facilities and infrastructure and an equitable distribution of rates. Thus, the objective for all of council's rates is to meet the shortfall between planned expenditures and expected revenues in order to achieve a balanced budget.

There are currently only two categories for rating, GRV and UV. Council proposes to introduce two new categories GRV Mining and UV Mining.

In relation to the introduction of a differential mining rate in the UV category, Council is satisfied that UVs generally form a proper and equitable basis for differentiation amongst these properties.

In relation to the introduction of a differential mining rate in the GRV category, Council is satisfied that GRVs generally form a proper and equitable basis for differentiation amongst these properties.

Proposed Differential Rating Categories

GRV Mining

This rating category covers all Mining Leases, Exploration Licenses, Prospecting Licences, Retention Licenses, General Purpose Leases, Special Prospecting Licences for Gold and Miscellaneous Licenses as defined under the Mining Act with a GRV valuation. It also includes properties with a GRV valuation that are held by or leased by a company whose primary activities involve mining. It does not include properties with a GRV valuation that comprise a single dwelling in the township of Boddington.

The proposed rate is 0.058205 cents in the dollar GRV Mining. Rates provided by this category, including minimum rates at \$899 are approximately 34% of the total rate requirements of council. There are three properties in this category which are effectively controlled by one ratepayer. The object of the rate for this category is to improve fairness and equity outcomes by providing some relief to this ratepayer from the effects of increases in the UV Mining category as the ratepayer in this category also has a substantial holdings in the proposed UV Mining category and is presently paying a very substantial portion of the general rates Council collects. On that basis the differential rate is to be decreased by a margin of 30% from that applied in 2016/17 and a similar decrease in gross rates received.

GRV General

AMENDED BUDGET 2017-18

Notes to and Forming Part of the Budget For the Year Ended 30 June 2018

This rating category covers all properties with a GRV valuation not categorised as GRV Mining. The proposed rate is 0.078813 cents in the dollar GRV General. Rates provided by this category, including minimum rates at \$899 are approximately 20% of the total rate requirements of council. This sector comprises the residential and commercial properties in the town area and Council considers that this sector has been contributing to the services and infrastructure of the shire in a fair manner. On that basis, the object of the rate for this category is to keep the gross increase in rates received to a small margin of 1.7% from that generated in 2016/17. This will occur despite a small reduction in the rate in the dollar.

UV Mining

This rating category covers all Mining Leases, Exploration Licenses, Prospecting Licences, Retention Licenses, General Purpose Leases, Special Prospecting Licences for Gold and Miscellaneous Licenses as defined under the Mining Act with a UV valuation. It also includes properties with a UV valuation that are held by or leased by a company whose primary activities involve mining.

The proposed rate is 0.031955 cents in the dollar UV Mining. Rates provided by this category, including minimum rates at \$899 are approximately 27% of the total rate requirements of council.

This sector comprises properties outside the town area which are not used for rural purposes. Council considers that this sector has not been contributing to the services and infrastructure of the shire in a fair manner. On that basis the differential rate is to be increased by a margin of 400% from that applied in 2016/17.

The object of the rate for this category is to rate properties at a higher than the UV General differential rate to improve fairness and equity outcomes by:

- Applying a premium to compensate for the different valuation method and comparatively lower valuation level compared to equivalent properties in built-up areas.
- · Applying a premium to reflect the following key points
- 1. Mining areas and known mineral resources cover a consideration portion of the district with the most extensive resource being bauxite.
- 2. Other than the Shire of Collie, the Shire of Boddington is the local government that is most impacted by mining operations in the South-West Land Divisior (generally the area from Geraldton to Esperance).
- 3. The Shire receives a number of enquiries from landowners and other stakeholders regarding the planning implications of living and investing in the vicinity o bauxite mining operations.
- 4. A mining buffer was originally identified in 2007 to assist in accommodating bauxite and gold mining and to reduce land use conflict. The mining buffer protects mining operations from sensitive land uses and development which could prejudice the extraction (now and in the future) of mineral and basic raw material resources.
- 5. The mining buffer covers a significant portion of the district including parts of the Boddington townsite, various rural residential and rural smallholding estates and many freehold rural properties. There is a mining buffer of 1200 metres for bauxite mining surrounding known bauxite resources.
- 6. The mining buffer has been proposed to be considerably expanded in recent years based on advice from South32 and State Government agencies including the Department of Mines and Petroleum.
- 7. The Shire has spent considerable time and funds to review the Shire of Boddington Local Planning Strategy, which was endorsed by the Western Australiar Planning Commission (WAPC) in 2007. A key driver of this review was the modified mining buffer. The Shire's efforts have included raising awareness and liaising with landowners, the community and stakeholders.
- 8. The Shire will spend an increasing amount of time and funds to assist in protecting and accommodating bauxite mining through the proposed Shire of Boddington Local Planning Scheme No. 3 (LPS3). This includes through the WAPC requirement to give statutory weight to the mining buffer through a Minir Buffer Special Control Area to be introduced into LPS3. LPS3 will also include provisions to control development within the Mining Buffer Special Control Area. Some of the implications will include:
- (i) The Shire being required to liaise with landowners and stakeholders and to discourage sensitive land uses (such as residential development) in clos proximity to basic raw material and mineral extraction operations.
- (ii) Increased planning and administrative resources, as most forms of development and changes of land use in the mining buffer will require a Development Application.
- (iii) While recognising the need to limit or prevent 'sensitive' development, there are competing legal issues, including a generally accepted right to construct a single dwelling on a lot. Many rural lots in the mining buffer currently do not have a dwelling.

AMENDED BUDGET 2017-18

Notes to and Forming Part of the Budget For the Year Ended 30 June 2018

- (iv) Anticipated reviews being submitted to the State Administrative Tribunal, due to the Shire refusing Development Applications, based on incompatibility with bauxite mining.
- (v) There will be considerable liaising with South32, the Department of Mines and Petroleum, the Department of State Development, WAPC and other agencies on Development Applications, other planning proposals and land administrative matters, as they may affect basic raw materials and mineral resources.
- 9. South32 operations have resource implications on other Shire services and assets, including environmental health, emergency management, administration and roads.

The following map shows the approximate mining lease area of the company that will be impacted the most by this proposal, in relation to the shire boundaries. This shows the potential impact that the company has on all aspects of shire operations. The mining buffer is shown on attachment 8.5.1A.

Figure 1 Mining lease in relation to Shire boundaries

UV General

All properties with a UV valuation not categorised as UV Mining. The proposed rate is 0.006391cents in the dollar UV General. Rates provided by this category, including minimum rates at \$899 are approximately 19% of the total rate requirements of council. This sector comprises the rural properties outside the town area and Council considers that this sector has been contributing to the services and infrastructure of the shire in a fair manner. On that basis, the object of the rate for this category is to keep the rate in the dollar the same yet yield a small margin of 1.5% from that raised in 2016/17.

AMENDED BUDGET 2017-18

Notes to and Forming Part of the Budget For the Year Ended 30 June 2018

8c. RATING INFORMATION - 2017/18 FINANCIAL YEAR Proposed Differential Rates 2017/18

Shire of Boddington

Notice of Intention to Impose Differential Rates

In accordance with section 6.36 of the Local Government Act in its Budget for the year ending 30th of June 2018, the Shire of Boddington intends imposing the following differential rates and minimum payments.

Differential Rate Category	Rate in \$	Minimum Payment
Unimproved Valued Properties		
UV - Mining	0.031955	\$899
UV - General	0.006391	\$899
Gross Rental Valued Properties	>	
GRV - Mining	0.058205	\$899
GRV - General	0.078813	\$899

The figures shown above are estimates and may change as part of Council's deliberations after consideration of any submissions received.

A statement of the objects and reasons for the proposed differential rates is available at Council's offices Bannister Road Boddington Mon – Fri 9:00 AM to 4:30 PM and on Shire of Boddington website www.boddington.wa.gov.au

Written submissions from electors and ratepayers on the proposed rates and the minimum payments are to be addressed to the Chief Executive Officer Shire of Boddington PO Box 4 Boddington WA 6390.

Submissions received after 12 June 2017 will not be considered.

Chris Littlemore

Chief Executive Officer

The Local Government (Financial Management) Regulations 1996 r.23(b) provides that if a differential general rate or minimum payment differs from the proposed rate for payment set forth in the local public notice given under section 6.36, the annual budget is to provide details of the rate or payment set forth in the public notice and provide reasons for the difference.

The reason being that the Department of Local Government informally requested Council review the rates in the dollar for GRV and UV with a view to achieving consistency, that is, a uniform increase for all rate payers in the town and rural categories and if possible, Council's largest ratepayer, Newmont Boddington Gold. It was felt that this was a desirable outcome from the objective of consistency. The predominant increase for the majority of ratepayers is 1.5% as a result of this review.

12. RATE PAYMENT DISCOUNTS, WAIVERS & CONCESSIONS - 2017/18 FINANCIAL YEAR

The Shire of Boddington will not be providing a discount for early payment of rates for 2017/18.

13. INTEREST CHARGES AND INSTALMENTS - 2017/18 FINANCIAL YEAR

Rates are due and payable on 25 September 2017 or 35 days after the date of service appearing on the rate notice whichever is later.

An interest rate of 11% will be charged on all rate payments which are late. It is estimated this will generate income of \$15,806.

SHIRE OF BODDINGTON AMENDED BUDGET 2017-18 Notes to and Forming Part of the Budget For the Year Ended 30 June 2018

Instalment Options

Instalment options are available to ratepayers for payment of their rates.

Option I (Full Payment)

Full amount of rates and charges including arrears to be paid on or before 25 September 2017 or 35 days after the date of service appearing on the rate notice whichever is later.

Option 2 (Two Instalments)

First instalment to be received on or before 25 September 2017 or 35 days after the date of service appearing on the rate notice whichever is later and including all arrears and one half of the current rates and service charges. The second instalment to be made on 14 February 2018 or four months and 35 days from service of rates notice whichever is later.

Option 3 (Four Instalments)

First instalment to be received on or before 25 September 2017 or 35 days after the date of service appearing on the rate notice whichever is later and including all arrears and one quarter of the current rates and service charges. The second, third and fourth instalments are to be made on 5 December 2017, 14 February 2018 and 26 April 2018 or at two month intervals whichever is later.

The revenue from the imposition of the interest and administration charge under this option is estimated at \$16,326 as is dissected as follows:
