

Decks

What is a deck?

A deck is a flat surface capable of supporting weight, similar to a floor, but typically constructed outdoors, often elevated from the ground, and usually connected to a building.

What can I build?

The Building Code of Australia (BCA) has requirements for fire separation between properties. These provisions may require your deck to be setback a minimum of 900mm from any boundary, or your house.

Any proposed deck raised more than 0.5m above natural ground level and within 7.5m of an adjoining property requires screening to comply with section 5.4.1 Visual Privacy of the Residential Design Codes for single dwellings.

Do I need a Building Permit?

A Building Permit is required for any deck, regardless of the height from natural ground level. However, only proposed decks raised more than 500mm above natural ground level will require certification by a Structural Engineer, regardless of the proposed construction material.

How long does it take to get a Building Permit?

The *Building Act 2011* sets time frames in which the Shire of Boddington has to assess and determine an application for a Building Permit. The applicable timeframe depends on whether the building application is Uncertified or Certified.

It is important that you are aware of allowed time frames prior to lodging your application and that your application documentation is complete at the time of submission.

Should further information be required by the Shire of Boddington in order to assess the building application, the applicant may be given up to 21 calendar days in which to provide the outstanding information. If the information is not received within the 21 days, the application may be refused unless mutual consent has been granted for a further 21 days.

Uncertified Building Applications

An Uncertified Building Application can be submitted for Class 10 structures, such as a deck.

The Shire of Boddington has up to 25 business days from the date of lodgement to assess the application and issue a Building Permit. The required Certificate of Design Compliance will be issued by the Shire of Boddington as part of the application process.

Certified Building Applications

A Certified Building Application can be submitted for all Classes of structure.

Prior to lodging a Certified Building Application, a private Building Surveying Practitioner would need to be engaged to issue a Certificate of Design Compliance.

The Shire of Boddington has up to 10 business days from the date of lodgement to assess the application and issue a Building Permit.

How long until my permit expires?

A Building Permit is generally valid for two years from the date on which it was granted.

If more time is required to complete the building works, you can apply for an extension of time of up to a further six months by making a formal application and paying the prescribed fee.

What happens when I have completed my building works?

The nominated builder on the Building Permit must submit a Notice of Completion BA7 form to the Shire of Boddington within seven days.

Building Application Checklist - Deck

BA2 – Uncertified Application

		Attached
