

## Patios

### What is a patio?

**A patio is an open sided structure, enclosed on no more than two sides, with a roof that is impervious to water. A patio may or may not be attached to a dwelling.**

### What can I build?

Patios can be freestanding or attached to a dwelling, and can be constructed from metal or wood. The maximum height of posts for a patio is 2.4m. The maximum roof height for a flat roof patio is 2.7m and a gable roof is 4.2m.

Generally in a residential zone patios posts can be built up to the boundary with the roof and gutters no closer than 0.5m from the boundary. For further advice consult with the Shire of Boddington's Planning Services on 9883 4999.

On a corner property, a patio must be setback a minimum of 1.5m from the secondary street boundary; this may be reduced with an application to vary the Residential Design Codes.

### Do I need a Building Permit?

The *Building Regulations 2012* state that construction, erection, assembly or placement a freestanding patio with a floor area of 10m<sup>2</sup> or less and an overall height of no more than 2.4m does not require a Building Permit.

### How long does it take to get a Building Permit?

The *Building Act 2011* sets time frames in which the Shire of Boddington has to assess and determine an application for a Building Permit. The applicable timeframe depends on whether the building application is Uncertified or Certified.

It is important that you are aware of allowed time frames prior to lodging your application and that your application documentation is complete at the time of submission.

Should further information be required by the Shire of Boddington in order to assess the building application, the applicant may be given up to 21 calendar days in which to provide the outstanding information. If the information is not received within the 21 days, the application may be refused unless mutual consent has been granted for a further 21 days.

### Uncertified Building Applications

An Uncertified Building Application can be submitted for Class 10 structures, such as patios. The Shire of Boddington has up to 25 business days from the date of lodgement to assess the application and issue a Building Permit. The required Certificate of Design Compliance will be issued by the Shire of Boddington as part of the application process.

### Certified Building Applications

A Certified Building Application can be submitted for all Classes of structure.

Prior to lodging a Certified Building Application to the Shire of Boddington, a private Building Surveying Practitioner would need to be engaged to issue a Certificate of Design Compliance.

The Shire of Boddington has up to 10 business days from the date of lodgement to assess the application and issue a Building Permit.

### How long until my permit expires?

A Building Permit is generally valid for two years from the date on which it was granted.

If more time is required to complete the building works, you can apply for an extension of time of up to a further six months by making a formal application and paying the prescribed fee.

### What happens when I have completed my building works?

The nominated builder on the Building Permit must submit a Notice of Completion BA7 form to the Shire of Boddington within seven days.

## Building Application Checklist - Patio

### BA2 – Uncertified Application
