

Pergolas and Shade Sails

What is a pergola or shade sail?

A pergola or shade sail is a structure used to create outdoor shade. A pergola is an opened sided structure and has an open weave permeable roof, for example shade cloth, lattice.

A shade sail also has an open weave permeable roof that is only tensioned between several anchor points.

What can I build?

Pergolas or shade sails can be freestanding or attached to a dwelling or another structure. A pergola or shade sail may be located up to a side or rear boundary but no part of the structure may be attached to a dividing fence or protrude over an adjoining property.

Care should be taken to ensure that the cover to a pergola or shade sail is designed and located to avoid water runoff into neighbouring properties.

Do I need a Building Permit?

The *Building Regulations 2012* state that construction, erection, assembly or placement of a pergola or shade sail with a floor area of 20m² or less and an overall height of no more than 2.4m do not require a Building Permit.

How long does it take to get a Building Permit?

The *Building Act 2011* sets time frames in which the Shire of Boddington has to assess and determine an application for a Building Permit. The applicable timeframe depends on whether the building application is Uncertified or Certified.

It is important that you are aware of allowed time frames prior to lodging your application and that your application documentation is complete.

Should further information be required by the Shire of Boddington in order to assess the building application, the applicant may be given up to 21 calendar days in which to provide the outstanding information. If the information is not received within the 21 days, the application may be refused unless mutual consent has been granted for a further 21 days.

Uncertified Building Applications

An Uncertified Building Application can be submitted for Class 10 structures, such as pergolas or shade sails.

The Shire of Boddington has up to 25 business days from the date of lodgement to assess the application and issue a Building Permit. The required Certificate of Design Compliance will be issued by the Shire of Boddington as part of the application process.

Certified Building Applications

A Certified Building Application can be submitted for all Classes of structure.

Prior to lodging a Certified Building Application to the Shire of Boddington, a private Building Surveying Practitioner would need to be engaged to issue a Certificate of Design Compliance.

The Shire of Boddington has up to 10 business days from the date of lodgement to assess the application and issue a Building Permit.

How long until my permit expires?

A Building Permit is generally valid for two years from the date on which it was granted.

If more time is required to complete the building works, you can apply for an extension of time of up to a further six months by making a formal application and paying the prescribed fee.

What happens when I have completed my building works?

The nominated builder on the Building Permit must submit a Notice of Completion BA7 form to the Shire of Boddington within seven days.

Building Application Checklist – Pergola & Shade Sail
