

Retaining Walls

What is a retaining wall?

A retaining wall is a wall or structure designed and constructed to support soil at a slope steeper than can naturally be supported.

What can I build?

Retaining walls can be constructed using bricks, limestone/concrete blocks, post and panel, timber sleepers or stone pitching.

Retaining walls that retain more than 0.5m of soil must be setback a minimum of 1m from any boundary. If it is a requirement for a retaining wall to be closer than this, an application will need to be made to the Shire of Boddington to vary the Residential Design Codes.

Property owners either side of a boundary retaining wall are responsible for retaining and maintaining the land that is within their boundary.

Do I need a Building Permit?

The *Building Regulations 2012* state that construction, erection, assembly or placement of a retaining wall that retains ground no more than 500mm in height and is not associated with any other building work or with the protection of land adjoining the land on which the retaining wall is proposed does not require a Building Permit.

Retaining walls along boundaries will require a Building Permit regardless of height.

How long does it take to get a Building Permit?

The *Building Act 2011* sets time frames in which the Shire of Boddington has to assess and determine an application for a Building Permit. The applicable timeframe depends on whether the building application is Uncertified or Certified.

It is important that you are aware of allowed time frames prior to lodging your application and that your application documentation is complete at the time of submission.

Should further information be required by the Shire of Boddington in order to assess the building application, the applicant may be given up to 21 calendar days in which to provide the outstanding information. If the information is not received within the 21 days, the application may be refused unless mutual consent has been granted for a further 21 days.

Uncertified Building Applications

An Uncertified Building Application can be submitted for Class 10 structures, such as retaining walls.

The Shire of Boddington has up to 25 business days from the date of lodgement to assess the application and issue a Building Permit. The required Certificate of Design Compliance will be issued by the Shire of Boddington as part of the application process.

Certified Building Applications

A Certified Building Application can be submitted for all Classes of structure.

Prior to lodging a Certified Building Application to the Shire of Boddington, a private Building Surveying Practitioner would need to be engaged to issue a Certificate of Design Compliance.

The Shire of Boddington has up to 10 business days from the date of lodgement to assess the application and issue a Building Permit.

How long until my permit expires?

A Building Permit is generally valid for two years from the date on which it was granted.

If more time is required to complete the building works, you can apply for an extension of time of up to a further six months by making a formal application and paying the prescribed fee.

What happens when I have completed my building works?

The nominated builder on the Building Permit must submit a Notice of Completion BA7 form to the Shire of Boddington within seven days.

Building Application Checklist – Retaining Wall

BA2 – Uncertified Application

		Attached
