

‘Earthworks’ Information Sheet: Earthworks is the process of excavating soil or providing fill on a site lot for changing ground levels prior to the preparation of associated construction, alteration, demolition or removal of a building.

What earthworks can I undertake?

Depending on the zoning of your property, there may be restrictions regarding what or where earthworks can be carried out on site, such as how much vegetation can be cleared. If you are unsure if there are restrictions associated with your property, you should consult with the Shire of Boddington’s Planning Services on 08 9883 4999.

Do I need a Building Permit?

The *Building Regulations 2012* state that a Building Permit is required for earthworks that involve changing the natural ground level by more than 0.5m by either excavating or filling. A Building Permit is also required for any retaining walls associated with earthworks. The removal of trees or vegetation is classed as site clearing, not earthworks, and does not require a Building Permit. It may however require a clearing permit.

How long does it take to get a Building Permit?

The *Building Act 2011* sets time frames in which the Shire of Boddington has to assess and determine an application for a Building Permit. The applicable timeframe depends on whether the building application is Uncertified or Certified. It is important that you are aware of allowed time frames prior to lodging your application and that your application documentation is complete at the time of submission.

Should further information be required by the Shire of Boddington in order to assess the building application, the applicant may be given up to 21 calendar days in which to provide the outstanding information. If the information is not received within the 21 days, the application may be refused unless mutual consent has been granted for a further 21 days.

Uncertified Building Applications

An Uncertified Building Application can be submitted for Class 10 structures, such as Earthworks.

The Shire of Boddington has up to 25 business

days from the date of lodgement to assess the application and issue a Building Permit. The required Certificate of Design Compliance will be issued by the Shire of Boddington as part of the application process.

Certified Building Applications

A Certified Building Application can be submitted for all Classes of structures.

Prior to lodging a Certified Building Application to the Shire of Boddington, a private Building Surveying Practitioner would need to be engaged to issue a Certificate of Design Compliance.

The Shire of Boddington has up to 10 business days from the date of lodgement to assess the application and issue a Building Permit.

How long until my permit expires?

A Building Permit is generally valid for two years from the date on which it was granted.

If more time is required to complete the building works, you can apply for an extension of time of up to a further six months by making a formal application and paying the prescribed fee.

What happens when I have completed my building works?

The nominated builder on the Building Permit must submit a Notice of Completion BA7 form to the Shire of Boddington within seven days.
